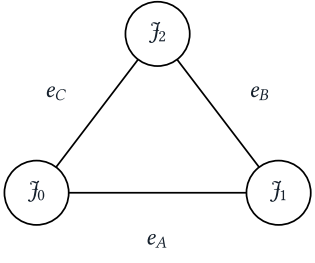
(a) One component



$\mathrm{pc}(T) = 1$

(b) Two coordinated components

	$\mathcal{J}_0$	$\mathcal{J}_1$	$\mathcal{J}_2$
$\mathcal{J}_0$	0	1	2
$\mathcal{J}_1$	1	2	0
$\mathcal{J}_2$	2	0	1

2 × 2 constraint

$\chi(i, j) = i + j \pmod 3$

$\mathrm{pc}(T \boxtimes T) = 3$
