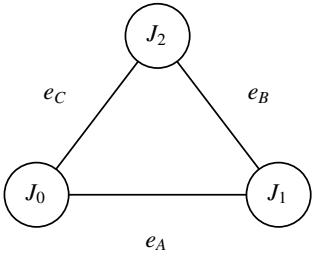
(a) One component



$\mathrm{pc}(T) = 1$

(b) Two coordinated components

	J_0	J_1	J_2
J_0	0	1	2
J_1	1	2	0
J_2	2	0	1

2×2 constraint

$\chi(i,j) = i + j \pmod 3$

$\mathrm{pc}(T \boxtimes T) = 3$
